

STREAM IMPROVEMENT PROJECT ANNOUNCEMENT

To All: We would like to do another stream improvement on Parched Corn Creek the weekend of June 21 (this coming weekend!) if we have enough participation. The project will be a stream constrictor at the old intersection of Rough Trail and Parched Corn. The FS has built a bridge crossing over Parched Corn and left the old crossing wide and shallow. By narrowing the stream we keep the water cooler and fish passage open. If everyone will let me know of your desire to participate, I'll go ahead and get the tools together. If another date would be better, please let me know that as well. Contact SANDY BROUGHMAN at wabiii@prodigy.net or call (859) 271-4652
